A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Blackwood 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that the entry on October 22nd is unduly low Treharris ·90 in Blackwood ·24 " Abertillery 1·28 " Has the amount been correctly copied from the original record? We should be glad if you would be good enough to verify the entry and let us know the result. It is suggested that the fall was probably 1·24 inch. A. Carter 25.6.26	The rainfall for the week ended the 24th October 1925 has evidently been copied out wrongly. It should be as follows:– 18 Oct. ·07 inch 19 " ·52 " 20 " 1·00 " instead of 2·00 21 " ·57 " 22 " 1·24 " instead of ·24 23 " ·48 " 24 " ·40 " Dan H. [illegible] 28 June /26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

Will you please say whether the sum of the daily entries should be adopted, or the entries modified?

G.S.

REPLY.

The correct total for March is 1·64 inches

In June the record for the 19th should be ·05 and not ·25 The total for June is 2·28 inches

Regret any error should have taken place, in making up return.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

Annual total at least 34 in rp

This ~~return~~ appears to ~~be~~ not all be required [illegible] ~~lower than ever~~ ~~this year~~

There is nothing very near however but it would appear to be rp shd. be inspected — and so already

Dear Sir,

In your return of observations for last year there are discrepancies between the totals for certain months* and the sums of the daily entries. These sums are set out below together with the amended total for the year.

I hope that if, by any chance, you do not concur in these amendments you will let me know.

Yours faithfully,

Rev. Canon J.T. Harding,

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.
26th June, 1926.

QUERY FORM.

On examination of the return of observations made at Sudbrook Pumping Station 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
With reference to the return of rainfall for 1925 from Sudbrook Pumping Station, which you were good enough to send, the total for September is given as 4·07, but the sum of the daily amounts is 3·86 inches. Will you kindly say if the discrepancy is due to an arithmetical error or to the omission of an entry? The latter is suspected because the number of rain days is given as 9. but the number of daily entries is only 8. The number of days with at least ·01 inch is considerably less than at neighbouring stations, and it seems possible that the gauge is not examined every morning or that the measure is not accurately divided to show ·01 inch or that small amounts are entirely neglected. I enclose a copy of Rules for Rainfall Observers and would invite your attention to paragraphs 9-11, pages 8 and 9.	The rainfall for Sept, 1925 is as follows:- Inches. Sept. 9th. .15 " 16th. .16 " 19th. .76 " 20th. 1.10 " 21st. .48 " 22nd. 1.12 " 23rd. .05 " 25th. .21 " 28th. .04 Evidently the fall of .21 on September 25th was omitted from my return. The rain gauge kept at Sudbrook is examined every morning and a true record of the contents taken and entered in the register. The glass measure is graduated from .01 to .50 of an inch and great care is taken in fixing the nearest line of measure on the scale to the water surface.

Superintendent.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at
Druidstone – Rainfall 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
We should like to print in British Rainfall 1925 the height above sea-level of the raingauge, and should be glad if you would give us the information if known. An approximate height would serve if exact figures are not available. M Salter Supt. 28/6/26.	Am unable to ascertain the exact height above sea level of rain gauge. But would put it approximately 280 ft E. H. G. Trowbridge

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return..........................
3. „ „ „ „ Weekly (Form 3110)..........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

QUERY FORM.

On examination of the return of observations made at The Bungalow, Tredegar 1925.
the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that the entries on 1st January and 22nd December are not in good agreement as shown below.	I regret not replying to your query earlier. During the twich days mentioned I was away & the Rainfall taken by another person so it is quite possible that they read wrongly. I am altering my Records according to your suggestion.

	Jan 1.	Dec. 22
Tredegar (Laboratory)	1.07	1.08
do. (Bungalow)	-	.04
Ebbw Vale	2.04	.92

It is recommended that values of 1.00 and 1.04 inches be adopted for these dates. If you concur in these amounts as amended, the totals will become Jan. 6.51 in Decr 6.30 in. and the year 60.45 in. We shall be glad to have your comments on these points.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at The Laboratory, Tredegar 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925 with neighbouring stations suggests that some entries are not in good agreement with the places set out below.

	Tredegar. (The Bungalow)	Tredegar. (Laboratory)	Ebbw. Vale.	Adopt
April 4	·90	·95	·83	1·95
" 5	·95		·94	
Aug. 8	·95	·32	·91	1·02
" 9	·13		·14	
" 12	1·25	·50	1·50	1·50

It is recommended that the values set out in the last column be adopted for these dates. If you concur in these amendments the totals will become April 4·44, August 6·73 and the year 54·50 inches.

We shall be glad to have your comments on these points.

H. Carter

REPLY.

I agree to adopt the figures as shown by you. – I have ascertained from other peoples readings that something must have happened to our rain gauge, or has been tampered with, by some unauthorised person, to cause this big difference in readings.
